BETACAMP XR INSTRUCTIONS

CLUB COOEE

How to neuroXcape   e-raving@clubCooee

1- Download Club Cooee's free app onto your mobile phone or PC (preferably Android and Windows) from your marketplace or open the app if you have already installed it.

2- Create your avatar/character. By default, the app will make you choose between male or female gender, but you can subvert this by customising your avatar with different elements that you'll find in the "Shop" section in the bottom bar of the menu. Club Coee will grant you 2750 Cooee Points (virtual currency) to start off with.
If you already have an avatar, you'll be taken straight to Club Cooee's "Home Page".

3- To browse through the existing rooms, click/tap on the "Parties" button in the bottom bar. On the "Parties" page you will see the most popular ones at the moment.

4- To search for NeuroXcape's room, tap on the magnifying glass icon at the top right-hand corner. Type "neuroxcape" in the search box and select the room called "NeuroXcape". After selecting the room, all you have to do is tap on "Join Room".

5- You're in! Welcome!

6- Slide one finger across the screen to move the camera and use two fingers to zoom in and out. To move your avatar and interact with objects in the room, simply tap on any point/object and your avatar will go there. If you can't find your avatar upon entering we recommend you fix the camera on a point (e.g. the dance floor) and tap there with one finger, your avatar will soon walk to the selected point.

7- Ready to e-Rave!
